**Presurgical Consent Form-General**

**Pre-Surgical Blood Testing - \$81.00**

Blood testing to evaluate liver and kidney function and red blood cell count can help us better reduce the risk of anesthetic complications. This test is recommended, but optional for animals less than 7 years old and required for pets over 7 years old (unless blood tests ran within last 3 months were normal)

**IV Catheter and fluids - \$43.00**

IV catheters significantly increase the safety of the anesthetic procedure. The catheter provides a route to administer emergency medicine in the rare cases needed and is also a route to maintain blood pressure during the procedure which has been shown to improve and speed recovery and decrease reactions to anesthesia. IV catheters are optional for pets under 7 years old, but required for pets over 7 years old.

**Pain medication**

All pets receiving surgery are given short acting sedative and pain medication before surgery. Although animals are good at hiding their pain, many routine procedures can cause post operative pain. We offer post operative pain medication in hospital and to be sent home for post operative pain control.
